**Description: Multiple airport transit visa (ATV) valid for airports in all Member States**

1. A multiple ATV valid for all Member States allows the holder to more than two transits through the international transit area of airports of all Member States and therefore “Schengen States” is entered under the heading “valid for”.
2. The duration of the validity of the visa is calculated as follows: date of first intended airport transit + six months.
3. An ATV does not allow the holder to enter the territory of the Member States and therefore the heading “duration of stay” should be filled in by “00”.
4. Type of visa: an ATV bears the identification code “A”.
5. In this example, the holder is allowed to transit through the airports in a all Member State more than two times. Therefore “MULT” is entered under the heading “number of entries”.

*Table 1: Entries into the machine-readable zone (MRZ)*
